Big PARDON SUE!

Our readers will probably remember reading in the last issue of the RECORD, about a stolen bucket, and that a Prussian Dutchman was the unfortunate loser. We have received a very polite note, which our editor translated in substance as follows: That we had made a very serious mistake in calling him a Dutchman, that he did not belong to that class of people but was a Hungarian, having displayed his for some time ago in that army, and risen to the honorable position of a captain. We are very sorry that such an error had occurred, and we find that it is our mistake and his treat, for he has, in fact, been paid for the bucket. It appears he was told to go to an office adjoining Mr. Holland's private house, but he comes and annoys our sanctum, demanding coin for something we knew nothing about. We hope our Hungarian friend will not do so again.

IN ALL CASES, of whatever nature, Dr. D. H. Whipple guarantees a cure. In cases of venereal diseases, piles of long standing, chronic diseases, etc., a cure is effected without the use of mercury. He cures piles in a short space of time. Consultation strictly confidential. Office at Mrs. Pyle's Lodging House—Room No. 5.

Good Paper Collars for 25 cents at Folsenthal's.

BUSINESS DIRECTORY.

Our aim in publishing a Business Directory on Friday is to give a complete list of all our advertisers in Pioche and vicinity; but our good intentions failed of full realization. Several of our patrons were unintentionally omitted; but a correct list will be given in due time. The following houses were omitted:

Jonas Cohn, dealer in cigars, cutlery, etc., Main street, opposite Meadow Valley street.

H. Solis, dealer in dairy produce, fruit dealer, west side of Main st., next door to Hamilton's saloon.

E. E. Braken, Agent Pioche Ice Co., office in Hamilton's building, Main st., opposite Meadow Valley street.

Jack Cohn, dealer in clothing, dry goods, etc., Main street, opposite Meadow Valley street.

C. Hemborg, shooting gallery, old Hardy House, opposite Locour.

FOLK & LEVIN, stationery, books, cigars, etc., were accidentally placed among the omissions.

A. BROWN, has reduced the wholesale price on all goods in his line twenty-five per cent. Whiskys from \$2.50 to \$2.00; Brandy from \$4.50 to \$3.50; Cognac, Chateau, and other wines \$32.00 per barrel. Everything else in proportion. Best of everything in the bar.

No. 1 cooks and gentlemanly waiters Wilman's.

I. O. O. F.—All members of the I. O. O. F. Association of Pioche, are requested to meet at the Hall, on Locour street, at a Tuesday evening, September 3d, at 8 o'clock, as business of importance will be transacted, preparatory to instituting a Lodge.

Go to Wilman's to get a good meal for 50 cents.

Overalls for 50 cents at Folsenthal's.

LOCAL MINING REVIEW.

For the week ending August 31.

We have but little change to record in the general condition of the mines in the District since our last review. The bullion keeps leaving every week at a rate sufficient to astonish the outside world at the immense mineral wealth of Pioche, which has been sufficient to give it a place second only to one in the known world.

We understand that during the past week a compromise has been made between the Desdemona and Huhn & Hunt mines, which caused a rise in the stock of the latter to \$7 per share.

Some important developments have been made and work on new mines commenced, which gives evidence of the indomitable spirit which the miners of this District have ever displayed. Everything seems lively through the streets, the stages arrive crowded, and daily strangers, who have come to purchase, may be seen in company with some hardy prospector intent on viewing his mine, and if it bears a favorable appearance a sale is generally effected. There is no silver bearing District on the Coast that has afforded the prospecting miner such chances as Pioche. We can count numbers that have gone to California, the East and Europe with large amounts of coin as a reward for their industry.

A little over two years ago the miner's struggles were severe; day after day he was compelled to make some very desperate breaks to obtain even bread; but that persevering disposition that has made this camp a success, predominated throughout, and to-day we have one of the most prosperous mining Districts in the United States.

Below appears a description of some of the mines and their prospects:

PACIFIC TUNNEL.—The working of this tunnel can be considered without a doubt the greatest enterprise that has yet been undertaken in Ely District. There has been no sparing of money or energy in the endeavors of the company to make this great project a success. The tunnel is now in a distance of nearly 1,000 feet with fine strata of ore at many places, and at the present face an apparent fine body is making its appearance. Fifteen thousand dollars have been expended so far, and the present results of the Pacific show that the money has not been laid out injudiciously, and we would say to the mining operators throughout the entire coast that the Pacific Tunnel stands in prospect next to the great Sutor. In all the great developments made within the last ten months in this district, great depth rich ores and well defined veins have presented themselves, and it has had the tendency to convince the most incredulous, that Pioche stands today the greatest silver mining camp yet discovered. The course of the Pacific Tunnel will be under all the great mines here, from the American Flag to Panama Flat. We would urge capitalists to look at this enterprise in a favorable light; contemplate the immense amount of treasure that will be developed at great depths by the Pacific Tunnel. Therefore, advance this enterprise; let your capital flow in that direction, and the vast mineral domain of Pioche will be brought to the rays of the sun and will be fully appreciated by yourselves and the world at large.

HUHNS & HUNT.—This mine has labored some time under many disadvantages, a lawsuit, and finally an immense cave in the main tunnel just beyond the turn table; but at last the mine cleaned up and risen to popularity, shaken the dust from itself, after laying dormant so long. Within the last week the stock rose to a figure that probably astonished many; why? A drift was driven into the hill and an immense ledge four feet wide struck, again. We understand a compromise was made with the Desdemona, the Huhn & Hunt has between three and four hundred tons of ore on its dump, averaging \$150 to the ton, and the mine actually shows in sight between two and three thousand tons ore. About 15 feet from the turn table, which is about 123 1/2 feet from the mouth, a winze 65 feet in depth has been sunk, and the ledge shows immense bodies of rich ore. In the tunnel the ore is base, but good in many instances. The whole length of the tunnel is 350 feet, and we ask operators in stock to consider all this work and the immense amount of rock in sight, and say where will the Huhn & Hunt stock reach to. Mining men who have not seen the workings of this company would not believe that such an amount had been done, but it is a fact, and the pure stuff is there. We have seen all this with our own eyes, and feel confident that it will soon become a profitable investment.

PHOENIX MINE.—In our last issue we gave notice of the heavy rains that were prevailing in this District, and we inadvertently stated that the Phoenix Mining Company's shaft was partly filled with water and that it became necessary to bale it out with buckets. The information was given us by some person whom we supposed was an interested party, but the owners inform us that our informant was some evil disposed person, who was actuated by malice against the owners because they have been successful in their efforts in making a rich strike. We are anxious to see the Phoenix men get their reward for hard labor. We have, since the return of our old mining local, spoken favorably of the mine for the simple reason we could not do otherwise, as the mine bears unmistakable merit. We find it would be impossible for water from the hill side to reach the mine. It appears the story originated from seeing two or three buckets of water hoisted from the shaft, which was nothing more than seepage water that occasionally collects in the bottom; otherwise the mine is dry and in good working order. The mine is constantly improving and work is prosecuted night and day. The working shaft, 553, has been commenced, over which hoisting works will be immediately placed.

THE WANDELL TUNNEL.—This is a location not heretofore mentioned in the RECORD, by the particular request of the owners. It is located under the new United States Mining Law, and is situated on the mountain next easterly from

Spring Mountain, the mouth being about 500 feet from the mouth of Spring Mountain Tunnel. The location claims 3,000 feet; but was intended particularly to cut the Sunburst and Magna Charta ledges. A contract was let to tap the Sunburst; and that ledge was tapped on Wednesday last. The length of the tunnel is now 190 feet. The Sunburst and Magna Charta are parallel to, and lie between the Sunbeam and Peavine; both known to the public as ledges carrying high-grade ore. They are about 250 feet from the former, and 150 feet from the latter. The owners now intend to consolidate and incorporate, and are sanguine that they have a valuable piece of property.

CHIEF OF THE HILL MINE.—We learn that all question of title to the Chief of the Hill mine, as claimed by the Eureka Tunnel, has been settled, and the right of way through the tunnel has been granted by its owners to the Chief of the Hill Mining Company, and that under the arrangement Mr. Wm. H. Raymond becomes an owner in the Chief. Under this settlement of affairs the Chief of the Hill mine has become rapidly what may be called a well developed mine. Above the level of the tunnel, through which the mine will be worked immediately, they have ore opened to the height of about 220 feet and 240 long. Mr. Hardy having sent down his resignation, to take effect upon the consummation of this new arrangement—having either important trusts to perform requiring his attention—Mr. D. B. Ross, late foreman of the Pioche, was appointed Superintendent. The average width of the vein as developed is over two feet, which, when taking into consideration the length of the levels and height of backs, the calculation of thirteen cubic feet to the ton gives the estimated quantity of ore in sight ready for stoping at 8,123 tons. The average assay is about 150 per ton, making a total gross value of \$1,218,450.

RAYMOND & ELY.—This mine still proves itself to be the great mine of the Pacific Coast. The last month's shipment was \$371,000, which includes 36 bars that came into the office of Wells, Fargo & Co's last evening, valued at \$60,000, the product of a three day's run. This is the largest amount of money ever turned out by any one mine in that short space of time in this State or in any other silver-bearing country throughout the United States. The Raymond & Ely tunnel out an average of \$13,000 per day for the month, and in the last three days \$20,000 per day. Col. Lightner can well be proud of being the Superintendent of such a great mine, and the company should feel that through the discovery of the Lightner shaft, Pioche has risen to a position that far exceeds anything yet chronicled. The immense deposit uncovered in this mine has had a tendency to help all in both mining and mercantile pursuits here, and the cry throughout the coast is nothing but Pioche. It has spoken for itself, and Virginia stands agast.

MARION MINE.—This mine has not been brought before the public for some time, and as a number have inquired of our local, relative to its prospects, and having yesterday taken a full view, we report as follows: The mine is situated just above the Spring Mountain shaft, and within about 600 or 800 feet from the American Flag mine. At the depth of 45 feet a drift is being run in a westerly direction with good indications of something rich being struck ore long. The Marion is a very favorable mine. On the dump there are 10 tons of first-class ore, and the mine at different points shows a fine ledge, and assays of the ore average \$236 per ton. Night and day shifts are being run constantly and we are confident that a large and rich body will present itself shortly.

NEWTON BOOTH.—The entire upper works of this mine are now finished. An engine of 16-horse power, is rigged in splendid order and will be running by Monday or Tuesday of the coming week. Thompson Campbell, the Superintendent, will go ahead and put the mine in proper shape for working. At the depth of 150 feet a platform has been laid some time ago and about 35 feet of dirt accumulated. This will all be cleared up, the platform taken out and the shaft cribbed. The mine will be worked in a miner-like manner, and the 16-horse apparatus will bring to the top the wealth that lies buried in its depths.

KHEDIVE.—This mine has been laying idle for a long time. The want of the necessary means had compelled the owners to stop work after having reached a depth of 50 feet. The mine has always borne a favorable appearance. The owners have let a contract to sink 150 feet, which will doubtless develop the claim to an extent that will prove its positive value. Work will be commenced to-morrow, under the supervision of Thompson Campbell.

CHIEF AND ANNA CONSOLIDATED.—These mines adjoining the Chief of the Hill on the east, will commence work to-morrow, sinking and drifting. Shaft down 40 feet. The mine shows a fine prospect, and the probability is that in due course of time something rich will be discovered.

LONG VALLEY DISTRICT.—Some very fine specimens of ore from this district are on exhibition at this office. We are assured that that within the next two weeks, a load of Long Valley ore will be hauled to Bullionville for reduction.

BISHOP BROS. have just received a large and fine assortment of Perfumery, Toilet and Fancy Articles, such as Florida Water, Pinard and Wright's Cologne, Lubin's and Phalon's Extracts, Florida Water, Pomades, Hair Oil, Cold Cream, Creme de la, Laird's Bloom of Youth, Bazin's Tooth Paste, Steiner's Glycerine, Honey and Elder Flower Soap, Lubin's Soaps, etc., etc., which, together with a full stock of Chemicals and Medicines, they are selling at the lowest market prices.

GRAND GIFT CONCERT.—The Grand Gift Concert, authorized by an Act of the Legislature, will positively take place in Security City on the 15th of October. Secure tickets in time, as the list of course will be closed when tickets are all disposed of. H. R. Braken is agent for Lincoln county.

OPEN ALL DAY.—As the Raymond & Ely and Meadow Valley Mining Companies pay off to-day, Wells, Fargo & Co. will keep their bank open all day for the benefit of those who wish to have their checks discounted.

Go to Folsenthal's and buy one of those Cassimere Suits from \$10 to \$20.

CUTTING SCRAPE.—The other evening considerable excitement was occasioned through the streets by seeing a woman carted off to the jail. It was the noted Spanish Bell Rogers. It appears she had a difficulty with Antoine, a Mexican, and had thrown a dirk at him, and if certain parties had not interfered, bloodshed probably would have been the result. Constable Hickey went into the house and endeavored to arrest her, but she had got hold of the knife again and made threatening strikes at Hickey. He drew his revolver, and tried to strike her on the hands that she might let go of the knife, but without effect, and not until the arrival of Officer Holland was he able to arrest her. She fought hard and in the melee cut her own hand with the knife. She was promptly taken to jail and held to answer. Considerable talk was made throughout the town that officer Hickey had struck the girl on the head. He did nothing of the kind, he did, as we said before, try to knock the knife from her hand with his revolver and save himself from being cut. All our officers endeavor to do their duty and what more can be asked of them. There are none of them, so as we can learn, that ever shirked their duty, and this talk around town and fault-finding with an officer for arresting a person who commits an offence and is a subject of arrest is very uncharitable, for they are but fulfilling the authority invested in them.

GREAT REDUCTION IN FREIGHTS.—IMPORTANT TO PICOCHE SHIPPERS.—The Central Pacific Railroad having reduced the rates of Freight from San Francisco to Ogden—to take effect July 18th, 1872, as follows:

FIRST CLASS, PER 100 LBS.	\$1.85
SECOND " " "	1.60
THIRD " " "	1.40
FOURTH " " "	1.25

PAYABLE IN U. S. CURRENCY.—And the Utah Southern Railroad being rapidly pushed forward—the route via SALT LAKE CITY offers to Pioche shippers, better inducements in time and at LOWER RATES than any other, over a good road and through a thickly settled country. The undersigned will advance charges, receive, and promptly forward all goods marked to their care at the very lowest rates.

GORDON & MURRAY,
Forwarding & Commission Merchants,
Salt Lake City.

ARKANSAS MINE.—In our notice of the above mine in Friday's issue, the type made us say that first-class steam hoisting works would be put up, but should have been, "first-class steam hoisting works have been put up and in splendid operation for three weeks." As this was a typographical error, we beg to be excused. The steam hoisting works of the Arkansas are of the best kind, and work admirably, the steam condenser condensing the steam and thereby saving half the expense that would be otherwise entailed on the company for water. We hear of several other companies which are about to use the condenser on that account. Everything about this mine is now in such a shape as to save expense; such, for instance, as the house that covers the engine, it being built with one end against the solid rock, and making the expense of building not much more than a miner's cabin. The Arkansas has as fine prospects as any mine in the district, and if it does not pay dividends shortly it will not be the fault of the management. The ore now on the dump, by milling, would pay all expenses attached to the working up to date.

WILSON & SOLOMONS, in Fulk & McAlpin's saloon are in constant receipt of full supplies of news matter of all kinds from the East and West, and stationery of every variety they keep always on hand. They also make a specialty of cigars and tobacco and their brands of these articles are not surpassed by any firm in town. For the accommodation of the reading public they also keep a fine circulating library.

One hundred and sixty head of horses have just arrived at Travis Bro's. Bullionville stable, for the accommodation of ladies and gentlemen, as they are thoroughbred American horses. They are worth trying.

H. WARD has reduced the price of furniture 20 per cent. from former prices; has new styles and best assortment in the State.

Everything warrants the assertion that Wiederhold really does keep the best assortment of fine cigars, tobacco and smokers' material. His stock of stationery is not equalled. As a further attraction, he has added a circulating library, and is furnishing novels and standard works to the reading public, for the small sum of 25 cents. Everybody knows where to find Wiederhold, opposite Meadow Valley street.

In our next issue we will give notices of our different advertisers, the wares they deal in, and will hereafter devote a portion of our columns to that purpose, giving the public information as to where they can purchase anything and everything.

CIRCULATING LIBRARY.—Folk & Levin on Main street have just received the latest and best publications at their extensive circulating library, and they offer it to the public at 25 cents per volume. Call and see them.

Eight pairs Cotton Socks for \$1 at Folsenthal's.

FORTUNATE.—The wife of our well known citizen, Mr. A. H. Doscher writes to her liege lord, that she has a present for him in the shape of a bouncing boy, born in San Francisco, Aug. 26, A. D. 1872. Bully for Doscher.

TRAVIS BROS. have an exchange stable, in Bullionville in connection with their Pioche stables. Saddle horses to let for \$2.50 to ride either way. No stable bill will be charged on our saddle horses at either end of the road.

NO DAMAGE.—Messrs. H. Lewis & Co., state that they find that there was no damage done to their goods stored in the cellar, by the rains as was reported in the last issue.

Don't forget that at Wilman's the best meals can be had obtained for 50 cts. Get yourself a fine Beaver Suit for \$24.50 at Folsenthal's.

THEATRE.

Friday evening Mr. Lorraine had his benefit, and the house was crowded. We are sorry to say that the entire performance met with anything but satisfaction. The boy's play displayed in the last act, together with the throwing around among the audience of dough, etc., met with considerable disapprobation. Such conduct as was exhibited Friday night has a tendency to injure Mr. and Mrs. Carter, who have won quite a reputation in many of their plays, and the people were inclined to help them; but such performances as passed off at Lorraine's benefit mortified all present, and the injury to Mr. and Mrs. Carter is almost irreparable. The audience did not blame them, but felt as if such bosh should not have been allowed, and retired in utter disgust. Many of the people of Pioche have seen some first-class actors and actresses, and are not disposed to brook such an attempt as was made on Friday evening. Last evening the historical tragedy of La Tour de Nesle was produced for the first time in Pioche. The house was decidedly slim—the inclemency of the weather, no doubt being the cause. The play was the best that has yet been produced here and the audience left the house fully satisfied with the evening's amusement.

IMPORTANT NOTICE TO PICOCHE SHIPPERS.—A great reduction of freight has been made by the C. P. R. R. Company on grain and flour shipped via Toano, by establishing the following rates:

From Marysville, 80 cents per hundred. From Sacramento, 75 cents per hundred. From San Francisco, 85 cts. per hundred.

The foregoing rates will take effect June 20, and remain in force till August 20. The name of consignee must be marked in full, or former rates will be charged.

F. F. MARK,
Forwarding and Com'n Merch't.

Beaver Hats for \$2 at Folsenthal's.

GOING EAST.—Maj. Chas. F. Powell leaves by the Salt Lake stage this morning. The Major bears with him the warm regards of many friends and earnest desire for his speedy return to Pioche.

ASHIM BROS. MODUS OPERANDI FOR THE PEOPLE.

THE LATEST AND THE BEST. THE BEST QUALITY OF GOODS IN THE MARKET AT ASHIM BROS.
